

Privacy Policy

Last updated: June 11, 2026

Where2Vibe ("Where2Vibe", "we", "us", or "our") helps people discover nightlife, parties, car meets, bars, clubs, happy hours, and other live events. This Privacy Policy explains what information we collect, how we use it, when we share it, and what choices you have.

We are a small team, and our privacy approach is simple: we collect and use information to operate Where2Vibe, improve the app, keep users safer, support hosts, process tickets and payouts, prevent abuse, and provide the features users expect. We do not sell your personal information as a source of revenue.

1. Who we are and what this policy covers

Where2Vibe is an event discovery, hosting, ticketing, and community platform. Users can discover events, view event details, interact with event listings, post events if approved as a host, purchase or manage tickets where available, join groups, send group messages, report content, and use other app features.

Where2Vibe provides event discovery and ticketing tools that allow hosts, venues, promoters, organizations, and other event creators to list, promote, manage, and sell tickets to events. Unless Where2Vibe clearly states otherwise, events are hosted, organized, and operated by the applicable host or event creator, not by Where2Vibe.

This Privacy Policy applies to information collected through:

- the Where2Vibe mobile app;
- the Where2Vibe website;
- Where2Vibe event pages, ticketing tools, host tools, moderation tools, and support tools;
- communications with us, including email, push notifications, and text/SMS messages where enabled.

This policy does not apply to third-party websites, venues, payment providers, social media platforms, maps, ticketing links, or services that are not owned or controlled by Where2Vibe.

2. Key roles on Where2Vibe

To make this policy easier to understand, we use a few terms:

Users means anyone who uses Where2Vibe.

Attendees means users who view, save, join, RSVP to, show interest in, buy tickets to, or attend events.

Hosts or Event Creators means users, venues, promoters, organizations, DJs, artists, car meet organizers, or other approved accounts that create, post, promote, manage, or sell tickets for events.

Promoters means users who participate in a Where2Vibe referral, promotion, ambassador, or host-growth program.

A person may be more than one of these at the same time. For example, a host may also attend another host's event.

3. Information we collect

The information we collect depends on how you use Where2Vibe.

3.1 Account information

When you create or use an account, we may collect:

- your display name;
- your email address;
- your profile photo;
- your bio;
- your city, area, or general location preference;
- your role or host status;
- your optional Instagram handle or other social handle;
- your login method, such as Google sign-in;
- your account settings and preferences;
- any other profile information you choose to provide.

Your display name, profile photo, bio, optional Instagram handle, host status, and public event activity may be visible to other users depending on how you use the app.

Your email address and phone number are not shown publicly to other users by default unless you choose to disclose them, use a feature that requires disclosure, or provide them to a host through ticketing, event registration, a form, support, or another feature.

3.2 Location information

If you grant location permission, we may use your device location to:

- show nearby events;
- calculate distance to events and venues;
- rank and recommend local events;
- support maps and location-based features;
- improve event discovery and app performance.

Depending on your device settings, this may include precise location or approximate location.

We do not sell your location data. We do not share your personal device location with other users. We do not store a continuous location history.

You can deny, allow once, allow while using the app, or revoke location access through your device settings. Where2Vibe can still work without location permission, but nearby event ranking, distance, map features, and local recommendations may be limited.

3.3 Content you create or upload

We collect content you create, upload, submit, or share through Where2Vibe, including:

- event titles;
- event descriptions;

- event dates and times;
- event addresses or location details;
- event flyers and photos;
- ticket links;
- ticket tier information;
- event categories, tags, age labels, and pricing;
- host information;
- group messages;
- reactions, votes, saves, interests, ideas, tips, and reports;
- support requests and moderation reports;
- any other content you choose to submit.

Events you post are generally public. Event flyers, event images, event descriptions, host names, event locations, and other event details may be visible to users and may be shared through normal app features.

If you upload images, flyers, logos, or other media, those files may be stored, processed, resized, displayed, reviewed, and shared within the Service based on where you post them. You are responsible for making sure you have the right to upload and share any content you post.

Avoid uploading images or event details that contain private information you do not want others to see.

3.4 Group messages and social features

If you use group features, we collect and store messages and related activity so group members can read and interact with them.

Group messages are visible to other members of that group. Your display name, profile photo, and other basic profile information may be visible to other users in the same group or conversation.

Group owners and members may have certain controls, such as deleting their own messages, removing members, or leaving a group.

Reported messages may be reviewed by Where2Vibe moderators. We may also review messages or group activity when necessary to investigate abuse, enforce our Terms, comply with law, or protect users.

3.5 Ticketing, purchases, orders, and check-in information

If you use Where2Vibe ticketing or paid event features, we may collect information related to ticket activity, including:

- the event you are purchasing tickets for;
- ticket tier name and quantity;
- order amount;
- service fees, platform fees, taxes, or other charges where applicable;
- order status;
- purchase time;
- refund status;
- ticket status, including valid, used, refunded, canceled, transferred, or expired;

- check-in or scan status;
- timestamps related to checkout, payment, refund, or ticket scan activity;
- limited payment-related identifiers returned by our payment processor.

We use third-party payment processors, such as Stripe, to process payments, identity verification, fraud prevention, host payouts, and related financial services.

Where2Vibe does not directly store your full card number, full bank account number, or full payment credentials. Those details are collected and processed by our payment processor according to its own privacy policy and terms.

If you buy, reserve, RSVP to, check in to, or otherwise participate in an event through Where2Vibe, the host or event creator may receive information needed to operate the event. This may include your name, email address, ticket tier, ticket quantity, order status, purchase time, refund status, check-in or scan status, and messages or support details related to that event.

Hosts may use this information to manage entry, verify tickets, communicate event updates, handle event support, manage refunds or cancellations, prevent fraud, and comply with legal obligations. Hosts may not use attendee information in ways that violate our Terms, this Privacy Policy, applicable law, or any consent choices you made.

3.6 Host, payout, and business information

If you apply to become a host, post events, sell tickets, receive payouts, promote events, or manage event money through Where2Vibe, we may collect additional information, including:

- host application information;
- venue, organization, business, or event name;
- host role or verification status;
- event history;
- ticket sales and payout-related information;
- refund and dispute information;
- payout setup status;
- identity, tax, banking, or verification information handled by our payment processor;
- communication and support history;
- moderation, review, approval, rejection, or suspension status;
- information needed to prevent fraud, abuse, duplicate accounts, fake events, or unauthorized event posting.

Some payout, tax, identity, and bank information may be collected and stored directly by our payment processor rather than Where2Vibe.

3.7 Promoter, referral, and ambassador information

If you participate in a Where2Vibe promoter, referral, ambassador, or host-growth program, we may collect and process information such as:

- your promoter status;
- referral code or referral link;

- referred host relationships;
- referral timestamps;
- host approval status;
- ticket sale eligibility;
- commission or payout calculations;
- fraud-prevention signals;
- support and review history.

We use this information to operate the referral program, calculate eligible rewards, prevent abuse, enforce program rules, and resolve disputes.

3.8 Phone numbers and SMS information

If you provide a phone number or use SMS-based features, we may collect:

- your phone number;
- SMS opt-in status;
- SMS opt-out status;
- verification status;
- message delivery status;
- timestamps and related technical logs.

We may use SMS for account verification, security, event updates, ticketing updates, support, host tools, or other service-related messages where enabled.

You can opt out of promotional or non-essential SMS messages by replying STOP where supported. Message and data rates may apply depending on your carrier and plan. Even if you opt out of marketing or promotional messages, we may still send important service-related or legally required messages where allowed by law.

We do not share SMS opt-in consent data or SMS originator data with third parties for their own marketing purposes. We may share limited SMS-related information with service providers as needed to deliver messages, maintain compliance, prevent abuse, or comply with law.

No mobile information, phone numbers, SMS opt-in data, SMS consent records, or text messaging originator opt-in data will be shared with third parties or affiliates for marketing or promotional purposes. This includes SMS consent information collected through the Where2Vibe app, website, account verification, ticketing, payout setup, event management, or support flows. We may share limited SMS-related information with service providers only as needed to deliver messages, maintain compliance, prevent abuse, troubleshoot delivery issues, maintain security, or comply with law.

3.9 Usage, analytics, and interaction data

We collect basic usage and interaction data to understand how Where2Vibe is used and to improve the Service. This may include:

- screens viewed;
- events viewed;
- searches;

- saves;
- taps on "Going," "Interested," or similar actions;
- ticket checkout activity;
- ticket scan activity;
- feature usage;
- referral activity;
- app opens;
- crash reports;
- performance logs;
- aggregated event analytics.

We may use this information to improve event recommendations, help hosts understand event performance, debug problems, prevent fraud, improve retention, and make the app easier to use.

Where2Vibe may show hosts aggregated or event-specific performance information about their own events, such as views, saves, interest, ticket sales, scan counts, or other event analytics.

We may use aggregated, anonymized, or de-identified information about app usage, event trends, search activity, ticketing activity, and feature performance for analytics, safety, business, and product-improvement purposes. This information does not reasonably identify you.

3.10 Device, log, and technical information

When you use Where2Vibe, we may automatically collect technical information, including:

- IP address;
- device type;
- operating system;
- app version;
- browser type;
- device identifiers or installation identifiers;
- timestamps;
- crash logs;
- error logs;
- referring pages or links;
- approximate location derived from IP address;
- security, fraud, and abuse-prevention logs.

We use this information to operate, secure, debug, monitor, and improve Where2Vibe.

3.11 Push notification tokens

If you enable notifications, we may store a push notification token from Apple Push Notification service, Firebase Cloud Messaging, Google, or your browser so we can send alerts about events, tickets, groups, moderation, host activity, security, support, and updates.

You can disable notifications in your device settings at any time. Disabling notifications may limit your ability to receive event reminders, ticket updates, address-drop updates, host alerts, group activity, or other time-sensitive messages.

3.12 Information from third parties

We may receive limited information from third parties when needed to provide the Service, such as:

- basic profile information from Google sign-in or another login provider;
- payment, payout, refund, fraud, or dispute information from payment processors;
- delivery status from email, SMS, or push notification providers;
- map, geocoding, or location-related information from map providers;
- app store, device, analytics, or crash-report information;
- public event information from public sources or third-party event listings;
- information from users, hosts, or support reports.

If another user submits information about you, such as in a report, group message, event role, or support request, we may process that information to operate the Service, investigate issues, or enforce our Terms.

4. How we use information

We use information for the purposes described below.

4.1 To operate Where2Vibe

We use information to:

- create and manage accounts;
- sign users in;
- display profiles;
- show events;
- post and manage events;
- operate ticketing;
- process orders and refunds where applicable;
- support ticket scanning and check-in;
- operate groups and messaging;
- provide host tools;
- provide admin and moderation tools;
- provide support;
- maintain app functionality.

4.2 To personalize and recommend events

We may use information such as your city or area, event views, saves, interests, categories, search activity, ticket activity, and location if you allow it to:

- recommend events;

- rank nearby events;
- personalize feeds;
- show more relevant categories;
- improve discovery;
- reduce irrelevant results.

You can limit location-based personalization by denying or revoking location permission through your device settings.

4.3 To support hosts and event creators

We may use information to:

- help hosts create and manage events;
- provide event analytics;
- process tickets and payouts;
- support event promotion tools;
- review host applications;
- prevent fake events, unauthorized events, and duplicate posts;
- send host-related notices;
- support refunds, disputes, cancellations, and ticketing issues;
- enforce our Terms and event rules.

4.4 To process payments, ticketing, refunds, and payouts

We may use payment and ticketing-related information to:

- start and complete checkout;
- confirm purchases;
- send ticket confirmations;
- validate tickets;
- scan tickets at entry;
- process refunds where applicable;
- handle payment disputes;
- calculate platform fees;
- support host payouts;
- prevent fraud and abuse;
- comply with legal, tax, accounting, and financial obligations.

Full card and bank details are handled by payment processors, not directly stored by Where2Vibe.

4.5 To communicate with you

We may use your information to send:

- account messages;
- security alerts;
- support responses;
- event reminders;
- group activity notifications;
- ticket confirmations;
- refund or billing updates;
- host notices;
- moderation notices;
- app updates;
- important legal or policy notices;
- optional marketing or promotional messages where allowed.

Even if you opt out of marketing messages, we may still send important non-marketing messages related to your account, tickets, safety, security, support, transactions, or the Service.

4.6 Marketing and event communications

Where2Vibe may send you service-related messages about your account, tickets, events, safety, support, moderation, refunds, cancellations, or important updates. These are not marketing messages.

If we send optional promotional or marketing messages from Where2Vibe, you may opt out where required by law.

If we allow hosts, venues, promoters, sponsors, or other third parties to send marketing messages through Where2Vibe or receive your information for marketing, we will do so only where allowed by law and, where required, with your consent. You may opt out of marketing messages without affecting important service-related messages.

Hosts may still contact you about an event you registered for, purchased a ticket to, or otherwise participated in when necessary to operate the event, provide event updates, manage entry, handle cancellations, respond to support issues, or comply with legal obligations.

4.7 To keep Where2Vibe safer

We may use information to:

- detect and prevent fraud;
- detect fake events;
- investigate reports;
- identify duplicate or abusive accounts;
- prevent spam;
- prevent unauthorized scraping;
- block suspicious activity;
- enforce our Terms;
- protect users, hosts, venues, and Where2Vibe;

- respond to safety concerns;
- comply with law.

We may use manual review, automated tools, or a combination of both to help detect abuse, review content, and enforce our policies. We do not guarantee that every event, message, user, flyer, image, or listing will be reviewed before it appears.

4.8 Automated tools

We may use automated tools, including fraud-detection, moderation, security, analytics, OCR, or support tools, to help operate Where2Vibe, detect abuse, review event submissions, prevent fake events, protect users, improve recommendations, and enforce our Terms.

These tools may support human review, but we do not guarantee that every event, message, user, image, or listing will be reviewed before it appears.

4.9 To improve and develop the Service

We may use information to:

- debug issues;
- monitor performance;
- understand which features are useful;
- improve app design;
- improve recommendations;
- test new features;
- measure growth and retention;
- analyze aggregate trends;
- build safer and more reliable tools.

We may create aggregated, anonymized, or de-identified information that does not reasonably identify you and use it for analytics, business, safety, and improvement purposes.

4.10 For legal, compliance, and business purposes

We may use information to:

- comply with applicable laws;
- respond to legal requests;
- enforce our Terms;
- defend legal claims;
- protect rights, property, safety, and security;
- audit internal processes;
- prevent illegal or harmful activity;
- support business transactions such as financing, merger, acquisition, or sale of assets.

5. How information is shared

We share information only in the ways described in this policy.

5.1 Public profiles and public event content

Certain information may be visible to other users, including:

- display name;
- profile photo;
- bio;
- public host profile;
- optional Instagram handle or social handle;
- public events you post;
- event flyers and images;
- event descriptions;
- event dates, times, and locations;
- public event tags, categories, age labels, and pricing;
- public interactions where the app shows them.

Do not post content publicly if you do not want other users to see it. Public content may be viewed, saved, shared, screenshotted, or copied by others outside of our control.

5.2 Hosts and event creators

If you interact with, RSVP to, join, buy tickets to, or otherwise participate in a host's event, that host may receive information needed to operate the event.

This may include:

- your display name;
- your email address if needed for ticketing, registration, event updates, or support;
- your ticket tier;
- your order status;
- purchase time;
- ticket quantity;
- refund status;
- check-in or scan status;
- questionnaire or form responses if that feature is used;
- messages or support details you send to the host;
- other event-related information you choose to provide.

Hosts are responsible for how they use information they receive, subject to our Terms, our rules, this Privacy Policy, and applicable law.

5.3 Service providers

We use service providers to help us operate Where2Vibe. These providers may process information on our behalf.

Categories of service providers may include:

- cloud hosting providers;
- database providers;
- image storage providers;
- authentication providers;
- payment processors;
- payout and identity verification providers;
- fraud prevention providers;
- analytics providers;
- app performance and crash-reporting providers;
- email providers;
- SMS providers;
- push notification providers;
- maps and geocoding providers;
- customer support tools;
- moderation and safety tools;
- professional advisors.

These providers are only allowed to use information as needed to provide services to us or as otherwise permitted by law.

5.4 Payment processors

When you use ticketing, paid promotions, payouts, or other paid features, payment processors such as Stripe may collect and process payment, payout, identity, tax, fraud-prevention, and transaction information.

Their use of your information is governed by their own privacy policies and terms.

Where2Vibe may receive limited payment-related information, such as transaction status, payment identifiers, payout status, refund status, dispute status, and fraud or verification signals.

5.5 Social media, event promotion, and third-party platforms

If you add a social handle, share an event, click a social link, connect with a third-party platform, or use a feature involving social media, the relevant third party may receive information according to its own privacy policy.

If a host opts into event promotion, paid promotion, or social posting features, event information such as the event name, flyer, date, category, and public event details may be used to promote the event through Where2Vibe channels or supported third-party platforms.

Where2Vibe is not responsible for the privacy practices of third-party social media platforms, venues, ticketing links, websites, or services.

5.6 Marketing partners, sponsors, and event partners

If Where2Vibe offers a feature that allows hosts, venues, promoters, sponsors, artists, brands, or other event partners to receive your information for marketing, we will do so only where allowed by law and, where required, with your consent.

If you choose to opt in to marketing from a host, venue, promoter, sponsor, or other third party, that third party may use your information according to its own privacy practices. You should review that third party's privacy policy if available.

You may opt out of optional marketing communications where required by law. Opting out of marketing does not stop important service-related messages about your account, tickets, safety, support, transactions, or events you participate in.

5.7 Groups

If you join a group, your display name, profile photo, and other basic profile information may be visible to other group members.

Messages you send in a group are visible to members of that group. Reported group content may be reviewed by Where2Vibe for moderation, safety, support, legal, or enforcement purposes.

5.8 Legal, safety, and enforcement

We may disclose information if we believe it is reasonably necessary to:

- comply with law, legal process, subpoenas, court orders, or government requests;
- enforce our Terms or policies;
- investigate fraud, abuse, illegal activity, or security issues;
- protect the rights, safety, and property of users, hosts, venues, the public, Where2Vibe, or others;
- respond to emergencies or urgent safety concerns;
- defend legal claims.

5.9 Business transfers

If Where2Vibe is involved in a merger, acquisition, financing, reorganization, bankruptcy, sale of assets, or similar transaction, user information may be transferred or disclosed as part of that transaction, subject to this Privacy Policy or a policy with similar protections.

5.10 Professional advisors

We may share information with lawyers, accountants, auditors, insurers, security consultants, financial advisors, or other professional advisors when reasonably necessary for business, legal, compliance, security, or risk-management purposes.

5.11 We do not sell personal information as a source of revenue

We do not sell your personal information for money.

Some privacy laws define "sale" or "sharing" broadly to include certain advertising, analytics, cookies, pixels, or similar technologies. If we use technologies that are considered a "sale" or "sharing" under applicable law, you may have the right to opt out as described in the "Your privacy choices" section below.

6. Cookies, pixels, and website analytics

Our website may use cookies, local storage, pixels, or similar technologies to:

- keep the site working;
- remember preferences;
- understand website usage;
- improve performance;
- measure traffic;
- detect abuse;
- support analytics or advertising where used.

This may include information such as pages visited, links clicked, referring websites, browser type, device type, IP address, and timestamps.

Where used, cookies or similar technologies may include:

- **Strictly necessary cookies** needed to operate the website, login, security, checkout, or other core features.
- **Analytics or performance cookies** used to understand traffic, usage, and site performance.
- **Preference cookies** used to remember choices or improve your experience.
- **Advertising or targeting cookies** used to measure or improve advertising where enabled.

You can control cookies through your browser settings. Some website features may not work correctly if cookies are disabled.

At this time, Where2Vibe does not use full mobile app session replay unless we specifically disclose that feature in an updated policy.

7. Your privacy choices

Depending on where you live, you may have rights regarding your personal information. These may include the right to request:

- access to personal information we hold about you;
- correction of inaccurate information;
- deletion of certain personal information;
- a copy of certain personal information;
- restriction of certain processing;
- objection to certain processing;
- opt out of certain marketing;
- opt out of certain targeted advertising, sale, or sharing where applicable.

You can make a privacy request by emailing support@where2vibe.com.

We may need to verify your identity before completing certain requests. We will not discriminate against you for exercising privacy rights.

Some requests may be limited where fulfilling the request would affect another person's rights, interfere with security or fraud prevention, prevent us from providing a service you requested, or conflict with legal, tax, accounting, safety, dispute-resolution, or compliance obligations.

8. Account deletion

You can delete your account at any time:

- **In the app:** open *Profile* > *Settings* > *Delete Account* and confirm.
- **By email:** email support@where2vibe.com from the email address connected to your account with the subject line "Delete my account."

When your account is deleted, we remove or deactivate your profile, push tokens, and personally identifying account fields.

Some content may be removed, anonymized, or retained depending on context. For example:

- public events you posted may be removed or anonymized;
- group messages may be removed, anonymized, or retained as part of group history;
- ticketing, payout, refund, tax, fraud-prevention, dispute, safety, and legal records may be retained where needed;
- support and moderation records may be retained to prevent abuse, enforce our Terms, resolve disputes, or comply with law;
- backup copies may persist for a limited period before deletion through normal backup cycles.

Account deletion requests are processed within 30 days unless a longer period is required or permitted by law.

9. Retention

We keep personal information for as long as reasonably necessary to provide the Service, operate Where2Vibe, comply with legal obligations, resolve disputes, enforce agreements, prevent fraud, support safety, maintain business records, and protect our rights.

Retention periods may vary depending on the type of information.

For example:

- account information may be kept while your account is active;
- public event content may remain visible while the event listing is active;
- ticketing, payout, tax, refund, and transaction records may be kept longer for legal, accounting, fraud-prevention, and dispute-resolution reasons;
- moderation and safety records may be kept to prevent repeat abuse;
- analytics may be aggregated or de-identified over time;
- deleted information may remain in backups for a limited period before being removed through normal backup processes.

If an account, host, promoter, event, ticket purchase, payout, referral, or other activity is connected to fraud, abuse, chargebacks, fake events, unauthorized event posting, policy violations, or safety concerns, we may retain limited information for longer where reasonably necessary to prevent repeat abuse, enforce our Terms, resolve disputes, comply with law, or protect Where2Vibe, users, hosts, venues, and the public.

10. Security

We use reasonable technical and organizational measures designed to protect personal information, including HTTPS, access controls, encrypted database storage where appropriate, monitoring, and limiting access to personal information to authorized personnel or service providers.

No system, app, website, database, or internet transmission is 100% secure. We cannot guarantee that unauthorized third parties will never defeat our safeguards. If we learn of a data breach requiring notice, we will notify affected users or regulators as required by law.

You are responsible for keeping your account secure and for using trusted devices and networks when accessing Where2Vibe.

11. Reporting, blocking, and moderation

Where2Vibe provides reporting and blocking tools to help users control their experience.

You can report an event, profile, message, group, or other content through the app or by emailing support@where2vibe.com.

Reports may be reviewed by our moderation team. We may use reported content, account information, device/log information, messages, event details, and related activity to investigate reports and enforce our Terms.

You can block users through the app where available. Blocked users cannot message you or interact with your content through blocked features.

Where2Vibe support is not an emergency service. If there is an immediate threat, emergency, crime, injury, or unsafe situation, contact local emergency services, venue staff, or the event organizer directly.

12. No unauthorized scraping or data reuse

We do not authorize third parties to scrape, copy, harvest, extract, commercially reuse, train AI systems on, or republish user content, event listings, host profiles, user profiles, group content, flyers, images, analytics, ticketing data, or other Service data without our permission.

We may use technical, legal, and operational measures to detect, prevent, and respond to scraping, abuse, unauthorized automation, and misuse of Where2Vibe data.

13. Children and age-restricted events

Where2Vibe is not directed to children under 13, or a higher age where local law requires it.

If you are under the age of majority in your location, you should use Where2Vibe only with permission from a parent or legal guardian where required by law.

Many events listed on Where2Vibe may be 18+, 21+, or otherwise age-restricted. Users and hosts are responsible for following all laws, venue rules, ID requirements, and age restrictions.

If you believe a child has created an account or provided personal information, contact support@where2vibe.com and we will take appropriate steps to remove it.

14. Third-party links and services

Where2Vibe may contain links to third-party websites, ticketing platforms, maps, venues, promoters, social media pages, payment providers, or other outside services.

We are not responsible for the privacy practices, content, security, policies, purchases, refunds, ticket availability, event entry, venue rules, or actions of third parties.

If you interact with a third-party service, that third party's privacy policy and terms apply.

15. International users

Where2Vibe is operated from the United States. If you use the Service from outside the United States, your information may be processed and stored in the United States or other countries where our service providers operate.

Those countries may have data protection laws different from the laws in your location. Where required, we use appropriate safeguards for international transfers of personal information.

16. U.S. state privacy rights

Depending on your state of residence, you may have additional privacy rights, such as the right to know, access, correct, delete, or receive a copy of certain personal information, and the right to opt out of certain targeted advertising, sale, or sharing of personal information.

Where2Vibe does not sell personal information for money. If any analytics, advertising, cookies, pixels, or similar technologies we use are considered a "sale" or "sharing" under applicable privacy laws, you may request to opt out by contacting us at support@where2vibe.com.

We will not discriminate against you for exercising your privacy rights.

17. Changes to this Privacy Policy

We may update this Privacy Policy from time to time.

If we make material changes, we will post the updated policy and update the "Last updated" date. We may also provide additional notice, such as through the app, website, email, or other communication.

Your continued use of Where2Vibe after an updated policy becomes effective means you accept the updated policy.

18. Contact us

If you have questions about this Privacy Policy, privacy requests, account deletion, data access, correction, deletion, or other privacy concerns, contact us:

Email: support@where2vibe.com.

For urgent safety concerns, contact local emergency services first. Where2Vibe support is not an emergency response service.
